

Attention: SkillsUSA Maryland Automotive Service Technology, Automotive Refinishing Technology, Collision Repair Technology and Diesel Equipment Technology Instructors,

For the first time, Delmar, a part of Cengage Learning is making their online ASE Test Preparation tools available to all instructors and competitors planning to compete in SkillsUSA Automotive Service Technology, Automotive Refinishing Technology, Collision Repair Technology, and Diesel Equipment Technology competitions. Demar is asking that instructors share the materials only with student competitors. This tool will help your competitors prepare for any written tests they may have in their contest area.

Access will be terminated when the SkillsUSA national competitions begin in June 2010. Please use the contact information below to get the necessary link
